Paragraph - Listening test

Nipah virus outbreak is the latest disease that causes fear among people who suffered from Covid -19 pandemic. Though people are afraid Nipah may become a pandemic, it mainly spreads from animals to humans. The bats spread the virus to pigs and people who handle the pigs can get the disease. Saliva and urine from infected pigs contain Nipah virus and spread the disease to people.

The symptoms of Nipah virus infection include fever, headache, cough, sore throat and vomiting. The swelling of the brain called encephalitis may follow. In 40% to 70% of cases infected with Nipah virus may die.
