Test - 09 Read the following paragraph and answer the questions given below.

(10 marks)

Ants

There are more than 12,000 species of ants all over the world. Ants are social insects, which means they live in large colonies or groups. They eat insects, seeds, honeydew, bread, meat and cheese.

Ants don't have ears. Ants hear by feeling vibrations in the grounds through their feet. There are three kinds of ants in a colony: The queen, the female workers and males. Queen ants have wings, which they shed when they start a new nest. The queen is the only ant that can lay eggs. Ant colonies also have soldier ants that protect the queen, defend the colony, gather food and attack enemy colonies. When the queen of the colony dies, the colony can only survive a few months. Queens are rarely replaced and the workers are not able to reproduce.

1. What kind of insects are ants?
